

Influenza season starting!

Welcome to your first edition of new MedixMAB newsletter

MedixMAB newsletters keep you up-to-date with MedixMAB monoclonal antibodies.

MedixMAB influenza antibodies

Several specialists predict the next influenza season to be predominated by an influenza A virus subtype H3N2 - potentially causing dangerous epidemics worldwide.

MedixMAB monoclonal antibodies include markers both for influenza A and influenza B viruses:

- Influenza A clones [7304, 7305, 7307](#)
- Influenza B clone [9901](#)

Prepare for the upcoming influenza season - with MedixMAB monoclonal antibodies.

Information on other MedixMAB infectious diseases markers can be found on the internet:

- [RSV](#)
- [Chlamydia Trachomatis](#)

Place your order now!
