

Oligosphere Medium (OsM) Catalog Number: 1611

Product Description

Oligosphere Medium (OsM) is a complete medium designed for optimal growth of normal human oligospheres *in vitro*. It is a sterile, liquid medium which contains essential and nonessential amino acids, vitamins, organic and inorganic compounds, hormones, growth factors, trace minerals and factors prevent oligospheres attachment during culture. The medium is serumfree. It is bicarbonate buffered and has a pH of 7.4 when equilibrated in an incubator with an atmosphere of 5% $CO_2/95\%$ air. The medium is formulated (quantitatively and qualitatively) to provide a defined and optimally balanced nutritional environment that selectively promotes growth of normal human oligospheres *in vitro*.

Components

OsM consists of 500 ml of basal medium, 5 ml of oligodendrocyte precursor cell growth supplement (OPCGS, Cat. No. 1652) and 5 ml of penicillin/streptomycin solution (P/S, Cat. No. 0503).

Product Use

<u>OsM is for research use only</u>. It is not approved for human or animal use, or for application in *in vitro* diagnostic procedures.

Storage

Store the basal medium at 4°C, the OPCGS and the P/S solution at -20°C. Protect from light.

Shipping

Gel ice.

Prepare for use

Thaw OPCGS and P/S solution at 37°C. Gently tilt the OPCGS tube several times during thawing to help the contents dissolve. **Make sure the contents of the supplement are completely dissolved into solution before adding to the medium**. Rinse the bottle and tubes with 70% ethanol, and then wipe to remove excess. Remove the cap, being careful not to touch the interior threads with fingers. Add OPCGS and P/S solution into basal medium in a sterile field, mix well and then the reconstituted medium is ready for use. Since several components of this medium are light-labile, it is recommended that the medium not be exposed to light for lengthy periods of time. If the medium is warmed prior to use, do not exceed 37°C. When stored in the dark at 4°C, the reconstituted medium is stable for one month.

Caution: If handled improperly, some components of the medium may present a health hazard. Take appropriate precautions when handling it, including the wearing of protective clothing and eyewear. Dispose of properly.
